Better tool for Doctors and Clinics

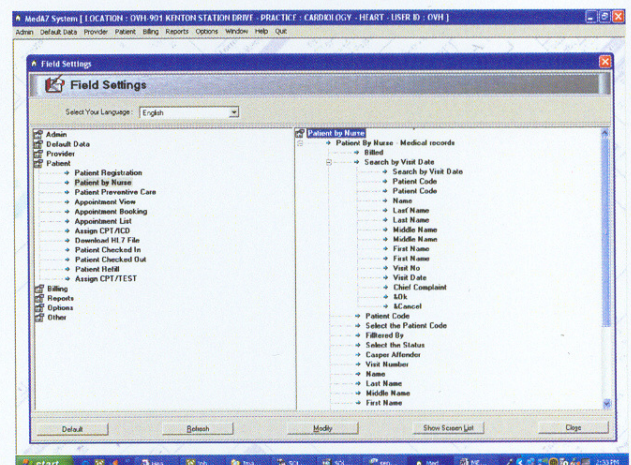

MedAZ is a complete medical practice management solution provided by KATSI. It is a tool that combines products and services to better manage healthcare organizations and improves the quality of patient care.

MedAZ is a Electronic Health Record (EHR) management solution that complies with privacy requirements standard.

Integrated EHR Solution

- > **MedAZ** solution is customizable, scalable and easy to operate
- > It has a language customization feature which allows you to change its labels and operational terms to ones that are familiar to you
- > It has a disaster recovery feature (optional) which allows you to backup your valuable records and data at an off-site location
- > It has a PDA (optional) interface to store medical records, approve and transmit prescriptions while mobile

Patient Registration and EHR Module

Manage patient information, store comprehensive electronic records with lab and test results for each visit. Get consolidated view on patient medical history including major complaints for past visits, diagnosis, drug interactions, payment history, surgery, lab, test results etc.

Appointment Scheduling Module

Allows administrative staff to schedule appointment times and related resources (specialists, nurse practitioners, equipment and equipment technicians). Assists staff in identifying procedures that require pre-certification from insurance.

EHR module

- > Facilitates the diagnostic process by providing doctors with a total view of the patient. Doctor can look at patient's background, family history, details of past visits, review different organ systems and make decisions more efficiently.
- > Decision tree to link symptoms to diagnosis and treatment which results in an EHR that is consistent with international standards for comprehensive patient medical record.
- > Automatic generation of Electronic Medical Records for the patient before the visit ends.
- > Generate EHR records in all major XML formats for transmission to other providers.

Billing module

- > Bills ready for submission when patient encounter completed.
- > Comply with documentation required for different E&M levels.
- > Mark ICD codes that should not be used for an insurance company
- > Submit electronic (EDI ^ 837) bills or paper bills.
- > Track expected v/s actual payments
- > Reduce billing errors

Insurance Billing Module

Doctors/Clinics are able to bill Auxiliary Healthcare Insurance Providers when needed.

EDI Module

- > Electronic claim submission.
- > Patient's eligibility inquiry.
- > Patient's claim inquiry.
- > Respond to electronic requests for additional information for a patient visit

> our story

Ya gotta make a living somehow, we chose applying IT to improve medical business processes. Our mission is the same as the provider; assist to save patient lives by providing timely information. Clients in US & Canada tap into more than 4 person-years of provider expertise built into the product. **MedAZ**, is totally secure, reliable, easy-to-use and integrates your workflow.

Koni Ameri Tech Services, Inc. (KATSI) founded in 1993 is a global IT company delivering services, solutions and products to enterprises worldwide.

Through our **Windham Health** affiliate, a healthcare management consulting firm, we have assisted clients like UMC, Southern Nevada and Clark County General Hospital of Southern Nevada with HIPAA healthcare compliance issues and consulting on healthcare information systems. Our company has developed a comprehensive HIPAA compliant healthcare solution for care delivery providers, called **MedAZ**.

MedAZ is a comprehensive healthcare solution for healthcare delivery organizations. The solution includes Appointment scheduling, EHR including templates customizable by specialty, symptom and disease, EDI Billing and collections modules that are scalable and grow with the practice. **MedAZ** is a totally secure, reliable, multilingual, easy-to-use software. It assists physicians and caregivers in providing services of exceptional quality and manages the complexities of healthcare more easily.

The product is kinda like EHR standards – constantly evolving to incorporate best practices and industry standards. Couple this with our licensed patented technology and device to share information in an emergency and you buy-in into a long term stable solution. Run with the little guy... create some change.
